

SCHOOL CLOSED - SCHOOL CLOSED - SCHOOL CLOSED

## FORCED SCHOOL CLOSURES?

# DON'T MISS A BEAT

When Covid-19 hit, we were in the middle of our school holidays and were quickly faced with the situation of converting our bricks and mortar school into an online school. This posed many challenges for all members of the community. **Everest** provided us with an effective means to communicate with students and parents, issue work, and continue our reporting and assessment cycle. **Everest** has an easy to use interface which means that students and parents can easily find the work that is required of them and receive direct communications from their teachers.

The homework module has enabled teachers to collect, mark, feedback, and return student work. As many of our teachers were operating in many different countries and time zones, this allowed us to work effectively from wherever they were located. Despite being away from the school for a number of weeks, we are still able to collate student grades and create reports in order to ensure learning is taking place.

**Mark Jones, Director of Teaching and Learning, Suzhou, China (11th March 2020)**

## remote teaching SOLUTION

Teachers can use Everest from their web portal, and can easily:

- Issue homework, learning materials, resources to pupils
- Make parents aware of the work that has been issued so that they can provide support
- Mark and return work from pupils and then capture their marks/grades
- Have a supporting dialog with pupils/parents about school work
- View pupil and parent contact details and other key indicators
- Send app and email communications to pupils, parents and other teachers

Pupils and parents can sign into **Everest** via their phone/tablet app or the web portal and collaborate with their teachers to **ensure that learning continues to take place.**
